FYI...this is an ongoing cleanup effort at the Old Bremerton Gasworks property at 1725 Pennsylvania Ave Bremerton. Website below provides a good description of what is going on should you receive any calls on the event. Mostly night work involving the cleanup.
Contact me if you have any questions.

Mike

Mike:

Wanted to give you a heads up that there will be some more night time beach work in Bremerton in the Port Washington Narrows. The schedule is flexible, but that is the current plan.

The EPA, Coast Guard, and Cascade Natural Gas continue to work on the oily coal tar on the beach at the north end of Pennsylvania Ave in Bremerton. So far the major steps have been to identify and contain the oily tar with a boom system. The last week or so has been focused on developing a plan by Cascade Natural Gas with EPA and Coast Guard oversight. At this point the plan is for Cascade Natural Gas to stage equipment at the Sesko property and start to remove the source of the oily tar. The staging is planned for Friday and Saturday (not Halloween) and the removal of the source (buried 12" concrete pipe) for next week.

The tides are against day time work so you can expect that there will be heavy equipment on the beach operating in the middle of the night. There may be trucks on the roads hauling away waste also.

The link below will take you to the EPA On Scene Coordinator website for this removal action. History, photos, etc...

www.epaosc.org/bremertonmgpwasterelease

Could you forward this to Cencom? Not sure who to notify there. I expect they may get some calls in the middle of the night next week.

BREMERTON-002348

Call or email if you have any questions.
